

BASIC TRAINING LASERBONDER

TARGET GROUP	Machine Operators without further knowledge
TRAINING GOAL	Operation of the bonder during production
SUBJECT	This module teaches basic theoretical and practical knowledge about the operation of the laser bonder in ongoing production.
DURATION	3 Days

TRAINING AGENDA

Introduction to the Laserbonder and into the Laserbond Process

- Laser Basics
- Laser Safety

Design and function of the machine and the machine processes in detail

- Machine Mechanics, Machine Setup
- Laserbond Parameters: Adjustment manual, Programming

Structure and function of the software Creation of Bond Programs incl. practical exercises
